Overview:

These discourses have been prepared by Musharaka Capital Co (the "Company") a Saudi Arabian closed joint stock company with commercial registration number 2051056409 dated 29 Rabie Alawwal 1435H (corresponding to 30 Jan, 2014), licensed by Saudi Capital Market Authority ("CMA" or the "authority") to conduct securities business in:

- Dealing as principal,
- Managing mutual funds
- Advisory
- Arranging
- Custody

Under license number 13169-27 dated 2nd Dhu Al-Hejjah 1434H (corresponding to 7 Oct, 2013). The company started its operations based on the commencement letter from CMA dated 13 Rajab 1435H (corresponding to 12 May, 2014). The company's paid up capital is SAR 65 million. The company's activities necessitate full compliance with the three "Pillars" of the Capital Requirements as defined in Prudential Rules ("PRs"). These are:

- Pillar 1, which sets out the minimum amount of capital that Musharaka needs in order to meet its basic regulatory obligations;
- ➤ Pillar 2: requires Musharaka to determine whether Pillar 1 capital is adequate to cover these risks and additional defined risks. This is achieved through the Musharaka's risk based Internal Capital Adequacy Assessment Process ("ICAAP") and is subject to annual review.
- ➤ Pillar 3, which require Musharaka to disclose key information about the underlying risks, risk assessment, management, controls and capital position hence the adequacy of capital.

The purpose of this document is to adhere to Pillar 3 requirements. Musharaka confirms there are no actual or foreseen legal impediments or liability that may affect the capital or require payment.

All disclosures hereunder were prepared based on the company's financial period starting from 1.1.2017 up to 31.12.2017.

The organization structure of the financial groups as the following:

Musharaka IPO Fund:

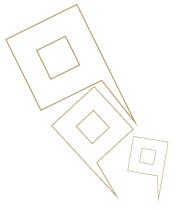

A Sharia'h compliant open-ended fund that invests in Initial Public Offerings (IPOs) and companies' shares newly listed in Saudi equity market. The Fund aims to achieve capital growth over the medium term. The company owns 18.49% of the fund's total outstanding units.

Musharaka Real Estate Income Traded Fund:

A Sharia'h compliant close-ended fund that invests in income generating properties. The Fund aims to achieve capital growth and annual dividend over the medium term. The company's investment representing 3.74% of the fund's total outstanding units (33.36 Million out of Million SAR).

- Tanseeq Al-Ola Trading Company (A Saudi Limited Liability Company) ("Tanseeq") is registered in Al Khobar under commercial registration number (2051213542) dated 3 Ramadan 1438H corresponding to 28 May 2017. The main activities of the Tanseeq are to purchase, sale and lease of land and real estate, real estate development and investment activities, building construction, and export, commercial and marketing commitments on behalf of others. Tanseeq did not carry out any operation since its inception.
- Alintifaa Alawwal Investment Company (A One Person Company Limited) ("Alintifaa") is registered
 in Al Khobar under commercial registration number (2051174260) dated 17 Rabi'll 1438H
 corresponding to 15 January 2017. The main activities of Alintifaa are management and rental of
 owned or leased properties (residential or non-residential), real estate development, investment
 activities, general construction of non-residential buildings, export, commercial and marketing
 commitments on behalf of others. Alintifaa did not carry out any operation since its inception.
- ARMAS Company Limited (A Saudi Limited Liability Company) ("ARMAS") is registered in Al Dammam under commercial registration number (2050028436) dated 7 Rabi I 1415H corresponding to 13 August 1994. ARMAS is engaged in the wholesale and retail trade in marble, industrial granite, wooden pallets, and wooden and metal furniture. During the year the Company purchased a 25% of the associate for a cost of SR. 3,500,000 which included a premium of SR. 1,775,000.

Capital structure

Musharaka's capital structure includes the following elements which form the capital base:

Paid-up share Capital:

An authorized and issued paid up capital of SAR 65 million distributed over 6.5 million shares of SAR 10 each.

➤ An audited Retained Earnings (Loss):

Represents an accumulated loss of SAR 9.76 million as of December 31, 2017

➤ Tier 2 Capital:

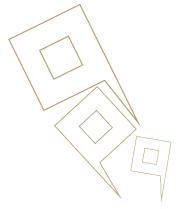

There are no applicable elements related to Tier 2 as of 31.12.2017.

- ➤ Net Capital base of SAR 54.65 million.
- The sum of market risk, credit risk, and operational risk (Pillar I) requirements of SAR 26.65 million.

The following table represent the capital adequacy for the years ended December 31, 2017 & 2016.

The capital base calculation (Tier 1&2) adjusted for applicable deductions was as follow:

Description	Dec, 2017	Dec, 2016	Change	Change %
Description	SR '000'	SR '000'	Change	Change /
Capital base				
Tier-1 capital	54,648	48,087	6,561	13.64%

ratio	2.05	4.72	-2.07	-30.57%
Surplus	27,999	37,902	-9,903	-26.13%

Capital adequacy

To ensure that it is in compliance with the Prudential Rules, the company maintains its capital above the minimum level set by the regulatory body. In this respect, Musharaka capital calculates its Capital Adequacy Ratio (CAR) considering the eligible proprietary investments and its risky activities as frequent as every month. Musharaka's CAR as of December 31st, 2017 was 2.05 ratio, and it is considered as a good ratio which is above the minimum required ratio of 1 to 1.

It is Musharaka's policy to maintain sufficient capital to:

- Meet regulatory requirements;
- ➤ Keep an appropriate credit standing with counterparties by maintaining financial prudence, and Maintain sufficient liquid funds to meet working capital requirements.

Calculation of the Musharaka's capital resources requirement

The company's capital resources requirement for regulatory reporting purposes is the sum of the credit risk, market risk and operational risk.

Risk management

A. Risk Management Purpose:

The purpose of Musharaka's Risk Management is to develop effective risk management policies and procedures to adhere to regulatory requirements. Through the efficient implementation of these policies, Musharaka is able to identify the risks relating to its activities, processes and systems and, where appropriate, to set the level of risk Musharaka is willing to undertake as a risk appetite. In addition, the risk management strategies and processes will facilitate the process of an on-going assessment and maintenance of the amounts, types and distribution of internal capital that Musharaka considers adequate to cover the level of risks to which it might be exposed.

B. Risk Management Policy:

This risk management policy is set and defined directly by the Board of Directors who has the full responsibility of updating it. The Board is also responsible for overseeing and approving the risk management strategy and policies, internal compliance and internal controls. Risk governing and supervision are carried out at the Board level who has direct oversight on all risk issues. Audit committee conducts annual review for the risk management policy taking into consideration various changes in internal and external business environment and possible impacts on Musharaka's businesses and accordingly updates the policy. Senior Management of Musharaka assesses risk, associated internal compliance, control procedures and report on the efficiency and effectiveness of risk management practices. The process of risk management and internal compliance and control includes:

- Identifying and assessing significant risks that might impact the achievement of the Musharaka's objectives through preventive controls.
- Developing risk management strategies to manage identified risks, designing and implementing appropriate risk management policies and procedures.
- Monitoring the performance and improving the effectiveness of risk management procedures.

Market risk

Market risk is the risk that the value of an investment decreases due to fluctuations in market prices and in particular, due to changes in interest rates, foreign exchange rates and equity and commodity prices. The associated market risk factors are the interest rate risk, the currency risk, the equity risk and the commodity risk. The associated market risks are captured in policies:

- Equity risk, the risk that stock prices and/or the implied volatility will change.
- Interest rate risk, the risk that interest rates and/or the implied volatility will change.
- Preventive measure identifies, measures, monitors, and reports market risk using a combination of tools including securities analysis, value-at-risk and stress testing.
- Assurance Musharaka's limits are in line with its policies and prudential requirements.
- Appraisal of concentration ratios including asset class and geographical coverage considering liquidity as major element.

Musharaka's Risk Management Framework incorporates market risk principles that aims to maintain prudent levels of exposure to market risks that may have adverse effects on profitability within the bounds of the company's risk tolerance.

Investment funds (HFT excluding fund	32		5
underlying)	32		5

Credit risk

Credit risk is defined as the probability of a counterparty to fail in meeting hbis/her obligations in accordance with agreed terms. The goal of credit risk management is to maximize returns by maintaining optimal credit risk exposure within acceptable parameters. Credit risk is inherent in the entire portfolio as well as in individual transactions. The effective credit risk management is a critical component of a comprehensive approach to risk management and essential to the long-term success of the company.

Credit risk management assists the management in developing quality counter-party base. Audit Committee, provides the necessary oversight in risk governance, management, assessment guidelines, and reports its comments and remarks to the BOD. Audit committee reviews the general risk structure on annual basis to ensure that it is commensurate with the changes in internal and external business environment. Management established policies and procedures to document following activities being undertaken to manage the credit risk. The following controls are adopted to manage the credit risk:

- Assess and reviews overall investment quality.
- Monitors and improves credit risk management techniques in order to implement the internal risk based approaches on counter parties.
- Concentration Limits are in place, reviewed and monitored.

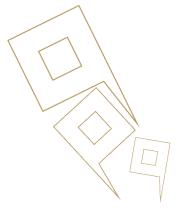

Credit Risks	2017 (SAR '000')	2016 (SAR '000')	Change
Exposures to APs, banks	137	613	(476)
Investment funds	19,567	5,350	14,217
High risk investments	2,402	-	2,402
Prohibited risks	21	-	21
Other on-balance sheet exposures	1,017	583	434
Total credit risk	23,144	6,545	16,599

Operational risk

Operational risk is the risk of loss resulting from inadequate or lack of internal control processes, mechanisms, people and systems or external events. It includes legal risk as well. It is inherent in all Company's business functions and can occur from a variety of circumstances such as fraud, error, omission or system failure.

For this reason, Musharaka has in place a business continuity policy that in the case of business interruption, it enables the preservation or at least the timely recovery and continuation of essential operations and functions. Also the exposure it has to its data providers is mitigated by ensuring the regular backup of its data and the maintenance, monitoring and update of its servers and networks and effectively built disaster recovery site that will be available online for its alternate recovery requirements. In addition to this has proper controls, authorization matrices and limits are in place with dual control concept on operations and well defined framework in respect of policies and procedures. Audit committee and Compliance reviews are carried out to identify control weakness. For calculating its capital requirements for operational risk, the company follows the expenditure-based approach as described in Prudential Rules.

Operational Risks	Voor 2	Voor 2	Voor 1	(SAR '000)			
1. Basic Indicator Approach	Year -3 2015	Year -2 2016	Year -1 2017	Average	Risk charge (%)	Capital requirements (SAR '000)	
Operating income 10,144		1,795	11,858	7,932	15	1,190	
2. Expenditure-based approach	1						
Overhead expenses (SAR '000)		12,311		25	3,078		
Total Operational Risks					3,078		

Liquidity risk

The Company assesses the liquidity risk through mismatch of assets and liabilities maturities over at least next one year's horizon.

The company evaluates the liquidity risk using the maturity ladder approach which involves analysing liquidity gaps in different time periods. This approach enables the Company in the evaluation of the gaps between the inflows and the outflows so that remedial measures could be taken in time.

The negative differences due to mismatches between the maturities of the assets and liabilities are made and adjusted with operational cash flows that are already stressed at 10%. An annual average funding requirement is computed using the net negative gaps and the cost of fund. This cost is taken as capital charge because it is presumed to have direct effect on the earning.

Currently, the maturity mismatch of the Company is in positive condition. Hence the measured amount of risk is also Nil.

Currently the liquidity is monitored by the management and BOD through projected cash in certain future period.

Other major risk

Reputation Risk

Is the probability of loss resulting from damages to the company's reputation, in lost revenue, increased operating, capital or regulatory costs, or destruction of shareholder value, consequent to an adverse or potentially criminal event even if the company is not found guilty. Adverse events typically associated with reputation risk include ethics, safety, security, sustainability, quality, and innovation. Reputational risk can be a matter of corporate trust.

Due to limitation of data and any other measure in the absence of the Company's market capitalization the following steps are used to qualitatively keep the risk mitigated:

- Detailed Anti-Money Laundering policy and procedures;
- Effective communication with stakeholders; and
- Enforcement of controls on governance, business and legal compliance.
- Promoting high standards of professional ethics by promoting the employees commitment to the Code of conduct.

Concentration Risk

The investment portfolio of the Company consists of exposures in one business line namely equity portfolio/investment funds. Since all the equity investments are classified as HFT and individually none of those has a significant value or excessive exposure.

Any exposure above the 25% of the total available capital of the Company is considered as highly concentrated and is considered for risk measurement. Any amount that is higher than the sated limit is subjected to maximum credit risk weight of 714% minus its regular credit risk weight already applied in credit risk measurement. The resultant amount is factored by 14% to arrive at capital charge.

The capital limit is taken from regulatory guidelines as the Company is allowed to have an exposure over and above this amount. Moreover, Company has made an investment during a year that resulted a large exposure >25% for an amount of 48,000 SAR. Therefore, the prohibited risk for an amount of 21,000 SAR was taken into account during calculation of Credit risk. The company fulfils the special capital requirements and the other conditions set forth in Prudential's in order to mitigate the risk.

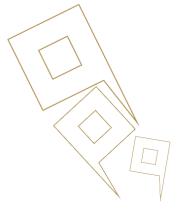

Business Risk

Business risk encompasses the exposure to uncertainty in the wider economic and competitive environment. The impact of that environment on Musharaka's ability to carry out its stated business plan. This risk is managed by a long-term focus, assisted by appropriate management oversight and a documented diversified corporate strategy and business plan.

Compliance Risk

Operating in highly regulated environment may result in general non-compliances of regulatory requirements therefore to mitigate any financial and reputational impacts the Compliance function is responsible for monitoring adherence to regulatory standards and for reporting its findings to relevant senior management, appropriate committees and to the Board. The Compliance function is also responsible for the provision of technical regulatory/compliance advice and support.

In this regard, Musharaka has established and implemented a comprehensive compliance program subject to an annual review.

Risk mitigation

Musharaka considering its risks arising out of it activities. Musharaka has adopted appropriate policies commiserating with its risk requirements which include various elements of risk mitigating techniques as following:

a) Credit risk

The Company does not regularly make investments in any of the categories other than HFT. Hence, credit risk is identified pertaining to investment in marketable securities and equity funds sector, which mainly comprises of equity funds in Saudi Arabia.

The Company calculates the capital charge for credit risk by applying the Standardized Approach as used in regulatory return for Pillar I. In using this approach, all balances (Company and others assets) and investments, excluding the trading portfolio, are categorized into the relevant buckets as prescribed in guidelines. Appropriate risk weights, based on credit ratings of counterparties are applied to determine the Company's overall credit risk weighted assets. The Investment portfolio of the Company includes investments in shares, which have been classified as HFT investment. The investment in equity funds is carried at cost and is subject to credit risk under the standardized approach as promulgated by CMA through its regulation.

MINIMUM CAPITAL REQUIREMENTS	I	1	<u> </u>	26,648
CAPITAL RATIO (time)				2.05
SURPLUS / (DEFICIT) (SAR '000)				27,999

b) Concentration risk

The financing and investment portfolio of the Company consists of exposures in two economic sectors namely equity portfolio/investment funds and real estate. Since all the equity investments are classified as HFT and individually none of those hold a significant value or excessive exposure.

Any exposure over and above the 25% of the total available capital of the Company is considered as highly concentrated and is considered for risk measurement. Any amount that is higher than the sated limit is subjected to maximum credit risk weight of 714% minus its regular credit risk weight already applied in credit risk measurement. The resultant amount is factored by 14% to arrive at capital charge.

The capital limit is taken from regulatory guidelines as the Company is allowed to have an exposure over and above this amount.

c) Liquidity risk

The Company's liquidity risk is assessed through mismatch of assets and liabilities maturities over at least next one year's horizon.

The liquidity risk is assessed using the maturity ladder approach which involves analysing liquidity gaps in different time periods. This approach enables the Company in assessing the gaps between the inflows and the outflows so that remedial measures could be taken in time.

The negative gaps due to mismatches between the maturities of the assets and liabilities are taken and adjusted with operational cash flows that are already stressed at 10%. An annual average funding requirement is computed using the net negative gaps and a cost of fund is arrived at. This cost is taken as capital charge because it is presumed to have direct effect on the earning.

Currently, the maturity mismatch of the Company is in positive condition, hence, the measured amount of risk is also Nil.

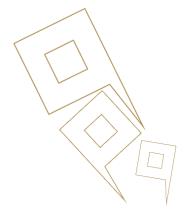

Currently the liquidity is monitored by the management and BOD through projected cash in certain future period.

d) Legal risk

Legal risk is arising from uncertainty due to legal actions or uncertainty in the applicability or interpretation of contracts, laws or regulations. Legal risk also includes risk arising from the lack of proper documentation of contracts.

The Company assesses the extent of legal risk by monitoring certain indicators which are indicative of risk concerns. The indicators are:

- Internally identified erroneous non-compliances;
- History of non-compliance events identified by CMA;
- No. of cases filed against the company;
- Duration of time for each case;
- Strength of documentation of each case. e.g. the strength of collateral documentation;
- · Value of the claim; and
- Complexity involved in the case i.e. regulatory concerns, cross-border cases.

The risk is measured by taking the un-avoidable and covered legal cases against the Company. These are factored at business growth factor to arrive at capital charge amount.

Legal risk is monitored rigorously by compliance department that ensures the Company's compliance with applicable rules and regulations on a regular basis and exception noted are resolved and followed in accordance with its procedural manual, as approved by the BOD.

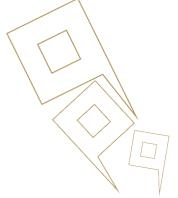

e) Reputational risk

The reputation risk can arise from following sources:

- No. of complaints lodged by customers;
- Failure to comply with regulatory or legal obligations;
- Failure to deliver minimum standards of service and product quality to customers;
- Unethical practices in the conduct of business;
- Failure to achieve financial performance targets;
- Association with suppliers, partners and alliances with poor reputations; and
- Employee dissatisfaction and negative publicity by media.

The following steps are used to qualitatively keep the risk under controlled.

- Detailed Anti-Money Laundering policy and procedures;
- Effective communication with stakeholders; and
- Enforcement of controls on governance, business and legal compliance.
